

The logo features a large, stylized blue 'F' shape that is slightly irregular and hand-drawn in appearance. This 'F' is superimposed over a large, solid yellow circle. The entire composition is set against a background that is split horizontally: the top half is a solid brown color, and the bottom half is a solid green color.

Fyne Vision

To be the best toolkit
for developing beautiful,
native graphical applications
across all platforms.

Why?

- Building cross platform graphical applications can be complicated, slow and difficult to test.
- We will redefine GUI development, making it easy to learn, intuitive and simple to achieve high test coverage.
- Fyne user interfaces can be deployed to any graphical devices with a single code base.

In 3 years

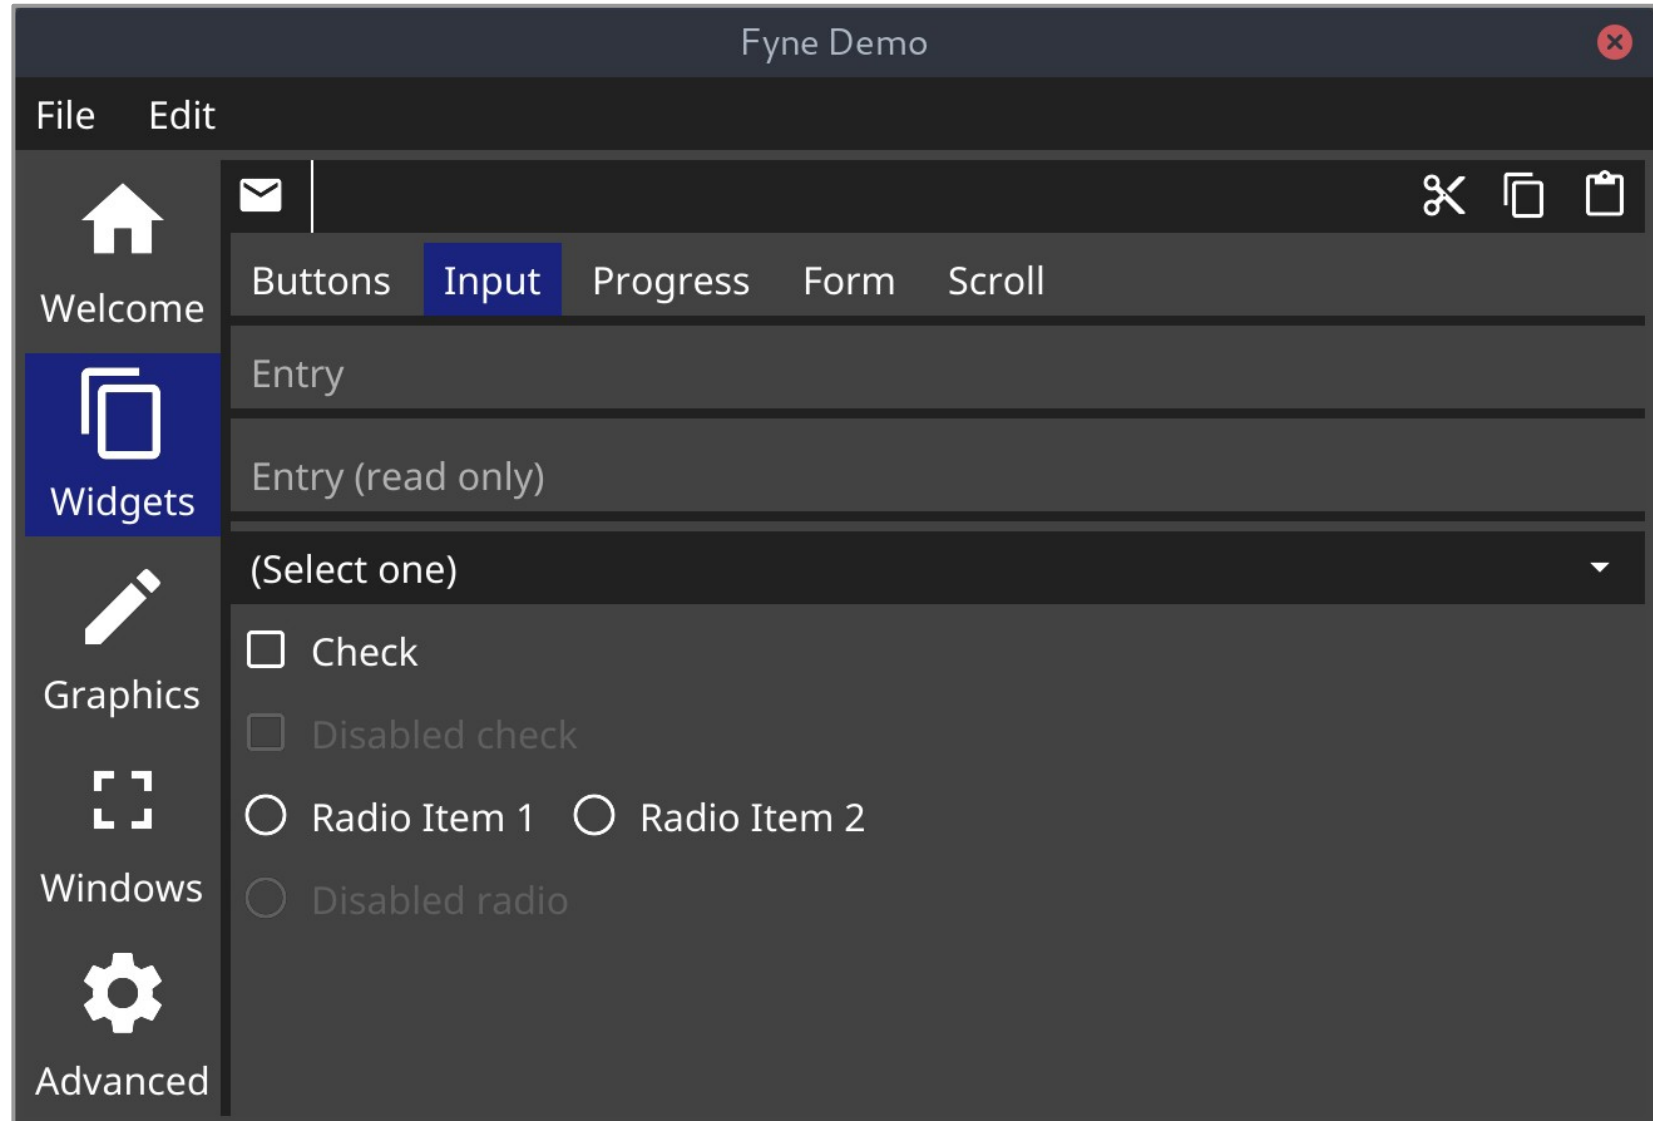

- To become the new standard for native graphical application development.
- With IDE plugins, WYSIWYG editors and supporting services apps developed will work seamlessly across all popular devices.

6 months

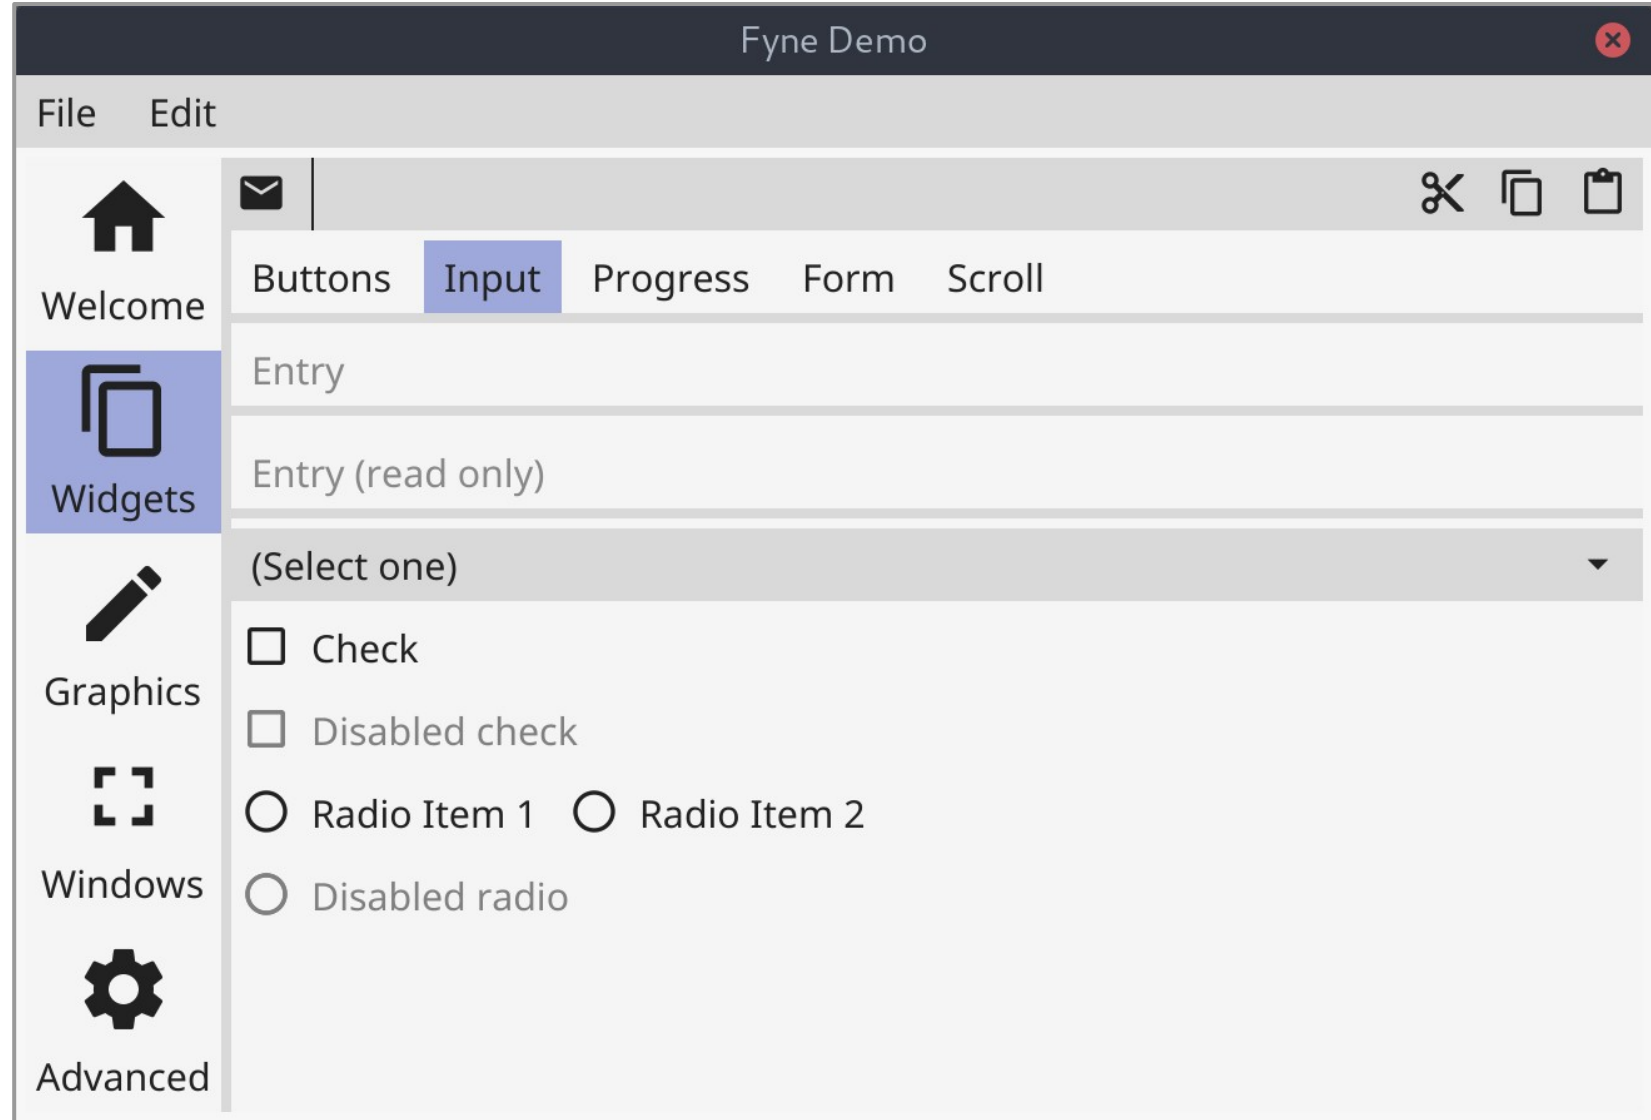

- Release APIs for desktop and mobile app delivery on a single codebase
- App configuration and data to be synchronised across all devices
- Delivery of applications through a cross platform app store
